

Individual colours can be added to highlight detailed areas

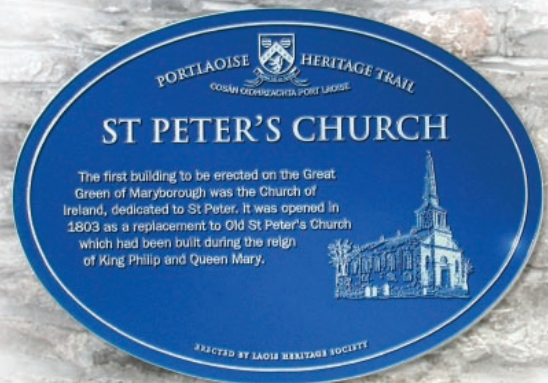

Add a "third dimension" to your signs with photocast deep etch system. This facility allows great creative scope and sophistication to special projects which are required to enhance in a non intrusive way.

This system is preferred by architects and local authorities for commemorative and memorial plaques. The process allows us to work in Zinc or Bronze which is durable and sensitive to areas of historical interest. Plaques of this nature weather well to reflect the uniqueness heritage and sensitivity of its environment.

These versatile materials are suitable for outdoor locations such as wall mounted or pavement insets which would be required in heritage trails.

Bronze cast plaque commissioned by Sustainable Energy Ireland

One of a series of 12 heritage plaques manufactured for Laois Heritage Society
